

Title: BudGeet

Description: With the BudGeet application we want users to be able to register and keep track of their personal expenses, as well as expenses in a group. Users can create wallets for personal use or in groups and add transactions to those wallets. For each wallet a leader is selected if in a group and an overview will be created.

as a User

i am able to get an overview of expenses

so that so i can see what my balance is

as a User

i am able to make create a shared wallet

so that multiple people can join for a group purchase

as a User

i am able to add my banking details to my account

so that i can manage them

as a Group leader

i am able to add people to a shared wallet

so that i can

as a Group leader

i am able to remove people from a shared wallet

so that i can manage people that don't contribute

as an admin

i am able to add catégories

so that i can make sure all types of expenses have catégories

as an admin

i am able to get a list of all shared wallets

so that i can see how many there are
